

John Smith

Senior Software Engineer

john.smith@email.com | +1 (555) 012-3456 | linkedin.com/in/johnsmith | github.com/johnsmith

San Francisco, CA, United States

PROFESSIONAL SUMMARY

Software Engineer with 7 years of experience designing and delivering scalable web applications, machine learning pipelines, and cloud-native infrastructure. Proven track record of leading cross-functional teams, optimizing system performance, and shipping high-impact products at scale. Strong communicator with deep expertise in Python, distributed systems, and DevOps practices.

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript, Java, SQL, Bash
Frameworks:	Django, FastAPI, React, Node.js, TensorFlow, PyTorch, Scikit-learn
Databases:	PostgreSQL, MongoDB, Redis, MySQL, Elasticsearch
Cloud & DevOps:	AWS (EC2, S3, Lambda, RDS), Docker, Kubernetes, Terraform, CI/CD, Linux
Tools & Methods:	Git, GitHub Actions, Jenkins, REST APIs, Microservices, Agile, Scrum
ML & Data:	NLP, Computer Vision, Pandas, NumPy, Apache Spark, Airflow

WORK EXPERIENCE

Senior Software Engineer

Google — Mountain View, CA | March 2020 – Present

- Built end-to-end machine learning pipelines using TensorFlow and Apache Spark, reducing model training time by 35%.
- Designed and deployed REST APIs with FastAPI serving over 10 million requests per day with 99.9% uptime.
- Led a team of 5 engineers to migrate monolithic services to Kubernetes microservices on AWS, cutting infrastructure costs by 28%.
- Implemented real-time data ingestion pipelines using Apache Kafka and Airflow processing 500GB of data daily.

Software Engineer

Meta — Menlo Park, CA | June 2018 – February 2020

- Developed backend services in Python and Django powering features used by 50M+ users.
- Optimized PostgreSQL queries and introduced Redis caching, reducing API latency by 40%.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time from 2 hours to 12 minutes.
- Collaborated with data scientists to integrate NLP models into production recommendation systems.

Junior Software Engineer

Stripe — San Francisco, CA | August 2016 – May 2018

- Built internal tooling dashboards using React and Node.js used by 200+ engineers daily.
- Wrote automated test suites (pytest, Jest) achieving 90%+ code coverage across core payment modules.
- Contributed to open-source SDKs in Python and JavaScript used by 100k+ developers.

EDUCATION

B.Sc. Computer Science — Stanford University, Stanford, CA

September 2012 – June 2016 | GPA: 3.8/4.0 | Dean's List

- Relevant coursework: Algorithms, Machine Learning, Distributed Systems, Databases, Computer Vision.
- Senior thesis: Real-time object detection using convolutional neural networks on edge devices.

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional (2022)
- Google Professional Data Engineer (2021)
- TensorFlow Developer Certificate — Google (2020)
- Certified Kubernetes Administrator (CKA) (2021)

PROJECTS

CV Parser — NLP Entity Extraction System

- Built a spaCy-based NER model to extract structured skills, experience, and education from raw CV text. Trained on 3,500+ annotated CVs achieving 78% F1 score. Stack: Python, spaCy, FastAPI, Docker.

Real-time Stock Sentiment Analyzer

- Designed a pipeline ingesting Twitter and Reddit data via APIs, running BERT-based sentiment analysis, and serving predictions through a React dashboard. Stack: Python, HuggingFace, Kafka, React, PostgreSQL.
